

Insulator Job Description

This position requires working directly with all types of insulation; fiberglass, spray foam, cellulose insulation. Insulators install insulation in residential and commercial projects; typically in the ceiling, floor and exterior walls. This requires the construction and use of scaffold, stilts, along with trade tools. Some of those tools include, but are not limited to; insulators knife, staple gun, pneumatic staple gun, caulking gun.

Each installer must wear protective gear: hard hats, masks and eye protection, which will be provided by Miller's Insulation. This position offers on the job training.
